

TOWN OF WEBSTER
Energy Committee

February 13, 2012
Meeting

Members in Attendance: Chairman Marty Bender, Police Chief Bob Dupuis, Dee Blake and Selectman Bruce Johnson; Visitors: Mason Donovan and Jere Buckley.

Scott Nichols, from Tarm Biomass in Lyme, NH, made a presentation on wood pellet furnaces. He shared thoughts on how a system might work in the Town Hall, and how a combined system with the Webster Elementary School and the Town Hall might work.

Dee is to set up a meeting on March 11, 2013, between the Energy Committee and the School Board to discuss possibilities of a combined system. We could also ask for John Abbott from John Abbott Enterprises or Jim VanVolkenburg from Froling Energy to make a presentation. Members to stay tuned for confirmation from Dee.

A short discussion ensued about the Town meeting warrant article for the solar lights. Marty is to look into additional information in order to answer questions asked at the public hearing.

The next Energy Committee meeting will be March 13, 2013, at 6:30, at the Town Hall. Agenda items to include: wood pellet furnace for the Town Hall; presentation from ReVision Energy, and anything else that comes before the Committee. Please send agenda items to Chairman Bender.
